Project Design Phase-I
Solution Architecture

Date	19/10/2022
Team ID	PNT2022TMID03488
Project Name	**Hazardous Area Monitoring for Industrial Plant powered by IoT**
Maximum Marks	4 Marks

Solution Architecture :

The monitoring of the hazardous areas in industrial plants is important from time to time. If the damage that occurs in hazardous areas can result in the loss of property or lives. So monitoring of such areas can help in easy monitoring of the hazardous areas.

- Incredibly simple architecture
- High capacity system
- Completely secure
- Cost Effective and Versatile
